

To Infinity and Beyond...

Books you may want to read

At the end of this topic I will be able to...

- Talk about the difference between day and night
- Be able to name some of the planets
- Begin to understand the role of the sun
- Be able to say what we can do to look after our planet
- Begin to understand the role of a Scientist
- Talk about the history of space
- Develop a broad vocabulary that can be transferred from subject to subject.

Key Vocabulary

Planet - A large body that moves around the sun in our solar system.

Sun - The star in the middle of our solar system. It gives us light and heat.

Moon - A piece of rock that travels around our planet, Earth.

Stars - A point of light in the night sky. The sun is the only one visible during the day.

Rocket - A flying device to get someone to space.

Space - The area that contains the planets, the sun and stars.

Astronaut - A person trained to go to space.

Earth - The name of the planet which we live on.

Key Questions...

What is the name of the planet we live on?
